

~~Allow changing the order of categories~~

~~Add Notes section for allergies. Allergies are colored differently.~~

~~Add subsection for order options because our house alcohol and top shelf have 3 categories with 3 prices. Mix \$11 shot \$8 rock \$10 ect. We dont want to have 1000 items on our menu.~~

~~Sections should look like~~

~~Casamigos Tequila~~

~~M or mix/\$16 / R or rocks \$12 / shot or s \$10 up to 4 categories. For food it would hypothetically be Pasta dish → Penne / Spaghetti / Linguine / Gluten-free Tacos → Soft corn / Soft flour / Hard shell~~

~~I want a section called manager control~~

Add section button to split bill for individuals in a room or table so they can split only what they ordered,

Make customizing minimum order and option

Home page should be manager view instead. Manager should be the only one allowed to change prices, and or remove items, Manager view should display karaoke room or table. guests count editor and room and table timers to keep track of time spent in rooms or seated that you can pause, resume, stop add time, leave notes and add orders like the servers.

Add notifications sound and or vibrate.

Create a reservation section for upcoming and past changed reservations

Add manager section employee pins

Add remove edit ect.

Add to manager settings customizable sound or vibration notifications by the

minute or after [5 -10 20](#) minutes for servers and kitchen. So kitchen. Get a notifications if fries take more than 20 minutes etc
Each item can have a different alarm basically

Add server sections to collect their own tips and see who is accountable for mistakes

Allow the orders to be shown on a tv through hdmi for lots of orders tablet might be too small

Allow bars or restaurant to run their own ads.

Make a manage reservation section for

host or managers. Auto fill the table or room so no accidentally putting someone in that table or room when it's busy.

Auto email option for reservations that are running late and dont answer calls or texts from staff. Telling them that their reservation will be canceled if not reply with (customizable time range)

Add to manager section, Add monthly items sales and times analytics

Allow the orders to be shown on a tv through hdmi for lots of orders tablet might be too small

Allow bars or resaurant to run their own ads.

Stripe or Square integration
auto tax
tip options

marketing automation

karaoke room and table timers linked to
orders

Toggle availability

Wait timer for orders

Monthly subscription and limit on the

number of employees allowed to use it at the same time

Take .03 of sales

Free to take orders like a notepad but doesn't send to kitchen and no analytics ect

Add server sections to collect their own tips

Manager view (simple but powerful)

Manager sees:

live tables

open tickets

longest wait time

what's delayed

Add store name and logo optional

Allow manager or host to pull itemized bills
to use a credit card machine to charge
or get cash payment

Add server or extra screen for kitchen
charge them

Replace login with Staff PIN login
optimized for restaurants.

- Staff selects role (server/kitchen/
manager) OR selects their name
- Enters 4–6 digit PIN
- System logs them in and sets role
permissions
- Managers can manage staff + PINs in
admin panel

Keep all existing pages and data. Add only
what's needed for PIN login + role-based
access.

Seed 3 demo staff accounts with PINs for testing and show where to change them.

There's no manager section on the website

Order notifications

Employee active work time. Shuts off most phone and app notifications and shows how much time they are and aren't on orderflow

Make a bell system.

3 or 4 customizable buttons that send nominations that the manager selects. 1. Take order 2. Bring check ect

Choose background from pictures

Voice order recognition

When you say order flow ai starts listening and sending to the tablet ect. But doesnt get sent to the kitchen until server confirms and or edits.

Notifies if not finalized.

Used for taking orders on the fly while holding stuff or at all times.

Upgrade to when the server repeats it it gets added. Including item options like well done. No ice. Ect
